

Home Asset Inventory

Activity — Classify Assets Connected to a Home Network

Overview

This inventory catalogs devices on a home network, documents their characteristics, evaluates network access exposure, and assigns a sensitivity classification based on the data they hold and the potential impact if compromised. Sensitivity tiers: **Restricted** (highest), **Confidential**, **Internal-only**, **Public**.

Asset Inventory Table

Asset	Network Access	Owner	Location	Notes	Sensitivity
Network Router	Continuous	ISP	On-premise s	Two frequencies — one for smart home devices, one for all others; admin access limited	Confidential
Desktop Computer	Occasional	Homeowner	On-premise s	Personal files, photos, financial docs, login credentials; password protected	Restricted
Guest Smartphone	Occasional	Visitor	On/off-premises	Connects during visits; owner may have limited security awareness	Internal-only
Smart TV	Continuous	Homeowner	On-premise s	Holds streaming login tokens; software not always auto-updated; potential attack entry point	Internal-only
Laptop Computer	Occasional	Homeowner's Spouse	On/off-premises	Used for remote work; may hold employer VPN credentials; connects to public Wi-Fi	Confidential
IP Security Camera	Continuous	Homeowner	On-premise s	Records interior/exterior video; live feed via app; default credentials must be changed	Restricted

Notes on Network Access

Continuous access devices (router, smart TV, IP camera) present a persistent attack surface — always online means always exposed. Continuous-access devices should receive priority in patching and monitoring schedules.

High-risk observations: The IP camera often ships with weak default credentials; if unchanged, any network-connected attacker can access the live feed. The laptop travels between home and public Wi-Fi, increasing exposure to man-in-the-middle attacks and potential exfiltration of employer data.

Sensitivity Classification Reference

Level	Meaning	Devices in this inventory
Restricted	Highest protection; strictly limited access	Desktop Computer, IP Camera
Confidential	Sensitive data; limited to authorized individuals	Network Router, Laptop
Internal-only	Internal use; not for public disclosure	Guest Smartphone, Smart TV
Public	Freely shareable; no harm if disclosed	(None in this inventory)
